

# Service Bulletin

**Subject: MW Legacy Grills (95, 98, 2 and 3) PM Certification Kit update**

**To: All Factory Authorized Service (FAS) Agents**

**Market: AIC**

**Date: September 18<sup>th</sup> 2020**

## Annual PM Certification kits

Garland continue to listen our service partners and customers. We have recently seen an increase in the comments we are receiving concerning the perceived complexity when trying to identify the parts required to complete grill certification on legacy grills.

To ensure the process is easier and faster for our service partners and customers we have now created a single kit part number. Each kit will contain all parts required to undertake a grill PM.

The kits will include all the seals, forms, stickers required as well as the food safe grease for the lift bearings.

On page 2 is a table showing the old part numbers as well as the new part number that has replaced them.

**It is important to note the new kits will now also include,**

Certification Form PN:  
4531265

Food safe grease PN: 4604309

**4518261 : LABEL CERT. ROW**

Preventative Maintenance / Certification Checklist	
<p>1. Check and correct condition of power source, including all electrical connections.</p> <p>2. Check that incoming voltage is correct and matches data plate.</p> <p>3. Check for damage to main power cord, including all electrical connections.</p> <p>4. Check for damage to power cord, including all electrical connections.</p> <p>5.
